SUMMARY

Software Engineer with 1+ years of experience building Full-Stack applications in production. Built a B2B/B2C e-commerce platform (Next.js + Django) and an inventory system that helped increase revenue by 15% for a school supplies distributor. English B2 (Cambridge FCE). Primary stack in Python/Django and TypeScript/React/Next.js, with a foundation in Spring Boot and .NET, plus experience integrating AI-powered educational platforms with 7+ active paying students. Currently developing FUTeate, a video-based football analytics platform that combines a computer vision pipeline (YOLO/Python) with RAG-powered performance reports.

EDUCATION

Universidad Peruana de Ciencias Aplicadas (UPC) 2023 - Present

Software Engineering Lima, Peru

Honors: Honor Scholarship & Top Third (GPA: 16.5)

EXPERIENCE

Maquinarias JYS | *Full-Stack Developer* | [Link](#)

Remote (Lima, Peru) April 2026 - Present

- Sole developer responsible for creating the e-commerce system from scratch: architecture, Django backend with Supabase and Google Cloud integrations, user authentication and persistence, interface design, and admin panel.
- Next.js frontend with modular architecture designed under Spec-Driven Design (SDD) principles and DDD.
- Implemented an admin panel with real-time sales, orders, products, and report generation for the business.
- Led validation cycles with 25+ customers, gathering orders, quotes, and continuous feedback as the sole developer.

Braymar | *Full-Stack Developer*

Remote (Lima, Peru) January 2026 - April 2026

- Designed and built from scratch the database architecture for a multi-warehouse inventory system (4 locations) on PostgreSQL, with a state machine for warehouse transfers and a stock movement ledger.
- Modeled a wholesale/retail pricing scheme integrated directly into inventory and sales workflows.
- Built a real-time dashboard to monitor access, best-selling products, and stock alerts; the admin panel generated a 15% increase in company revenue.

Librería JSR | *Frontend Developer*

Hybrid (Lima, Peru) December 2024 - September 2025

- Joined the frontend development team for a system for cataloging and selling school products.
- Implemented a catalog with brand and price-range filters, dynamic pagination, and a quick product view.
- Supported 10+ concurrent customers by combining the online catalog with web orders and in-store pickup (WhatsApp).
- Improved the sales flow by implementing online ordering with in-store pickup, simplifying the buying experience and enabling the system to boost business sales immediately after production deployment.

PROJECTS

FUTeate | *YOLO, Python, Next.js, React, Supabase* | *(In Development)*

- Web platform for football performance analysis using computer vision with YOLO, detecting players and the ball through a video editor interface for data measurement.

LlamIA | *TypeScript, Next.js, React, Supabase* | [Link](#)

- Built an AI-powered educational platform for Peruvian medical students.
- Includes an evidence gallery, activity tracking, and a real-time prompt editor using a Markdown parser and Supabase.
- Validated the business model with 7+ active paying students on the platform.

Klippr | *Flutter, Kotlin, MySQL, SQLite, Railway* | [Link](#)

- Led the development of a cross-platform mobile app for consumers and businesses, covering promotion and redemption flows.
- Implemented state management, local/remote persistence, and backend integration deployed on Railway over MySQL.
- Earned 18.5/20 on the AV2 assessment, achieving the highest grade in the section.

CERTIFICATIONS

- Cambridge English: First Certificate in English (FCE, B2)
- MongoDB University: Introduction to MongoDB
- Coursera: Programming for Everybody (Getting Started with Python)
- Coursera: Python for Web Development (University of Michigan)
- Coursera: SQL for Data Science

SKILLS

Backend & APIs: Python (Django) • Java (Spring Boot) • C# (ASP.NET) • PostgreSQL • MongoDB • MySQL

Frontend: React • Angular • TypeScript • JavaScript • Next.js • Astro • Vue

Mobile: Kotlin • Dart

Testing & Quality: Functional testing • Usability testing • Think Aloud

Tools & Workflow: Docker • Git • Azure • Vercel • Jira • Figma • Postman • Swagger

AI / LLM: Prompt engineering • Agent Orchestration (Harness) • Claude & Codex • GitHub Copilot

Architectures & Standards: MVC • CRUD • MVVM • DDD • CQRS • Web Accessibility • SEO

Currently learning: RAG pipelines • AWS Bedrock (Claude) • Local LLM deployment (Ollama/Llama.cpp)

LANGUAGES

Languages: Spanish (Native) • English | B2 Intermediate
